

**School of Computer Science & Engineering**  
**Department of Computer Science & Application**

**Class & Semester: TYBCA | VI Sem Date: 20-03-2024**

**Week No. 01**

**Date: 10-04-2024**

**Work Completed:**

**Project Overview:**

---

**Objective:** Continue development of the interactive chatbot system, focusing on integrating Dialogflow intents and backend functionalities.

**Key Activities:**

- Intensive training required for Dialogflow intents to enhance accuracy and understanding.
- Debugging and refining backend code for seamless integration with Dialogflow.

**Challenges Faced:**

- Ensuring secure and reliable integration of Dialogflow with the local backend server using ngrok.
- Testing and debugging the entire system to identify and resolve any remaining issues.

**Progress Made:**

- Successfully integrated Dialogflow intents with the backend FastAPI framework.
- Completed coding of backend functionalities for order management and tracking.
- Resolved initial issues with database integration and ensured smooth data storage and retrieval.

**Guides Remark:**
