

## School of Computer Science & Engineering

### Department of Computer Science & Application

**Class & Semester: TYBCA | VI Sem**

**Week No. 01**

**Date: 20-03-2024**

**Work Completed:**

**1. Project Kick-off:**

Officially launched the CoderFlex project with a kick-off meeting to discuss objectives, timelines, and team roles.

**2. Frontend Development:**

- Designed and developed initial wireframes for the user interface (UI).
- Created mock-ups to visualize the layout and design of the frontend using HTML, CSS, and JavaScript.
- Implemented basic frontend functionality, including navigation menus, search bar, and card components for programming languages.

**3. Technology Stack Selection:**

- Finalized the technology stack for frontend development, including HTML5, CSS3, and vanilla JavaScript.
- Decided on using modern web development practices and techniques to ensure scalability and maintainability.

**4. Documentation:**

- Started documenting frontend development processes, including design decisions, coding standards, and component specifications.
- Prepared initial drafts of user interface (UI) documentation to guide future development iterations.

**Guides Remark: Prof. Dr. Pankaj Patil**

PRN No.	Name of Present Student	Signature
210105011029	Vinit A. Mahale	
210105011037	Omkar R. Shejwal
