Class & Semester: TYBCA | VI Sem
Week No. 3

Date-05-03-2024

Objective: To develop an interactive chatbot using Dialogflow and Python FastAPI for natural language processing and backend support respectively.

Key Activities:

- Designed the intents for the chatbot, outlining user queries and expected responses.
- Developed a basic FastAPI structure for the backend.

Challenges Faced:

- Mapping user interactions to appropriate intents in Dialogflow.
- Establishing a consistent structure for the backend.

Progress made:

- Intent structure defined in Dialogflow.
- FastAPI routes and basic handlers created.

Guides Remark :
